INTRODUCTION

Name : RANK TOKEN
SYMBOL : RANK
PLATFROM : TRON
TOKEN TYPE : TRC20
TOTAL SUPPLY : 10 BILLION

Website : rank.icorank.info

Rank Token is a payment and a reward token. Will be used as a payment asset for different types of service. The main aim of this token is to support small budget blockchain project. The token will be used for increasing the trust of the users and reducing the market risk. Rank Token is Tron based token. Which requires a very low transfer fee. And will be perfect for the reward system.

Rank Model

- Payment

- Reward

- Risk Free

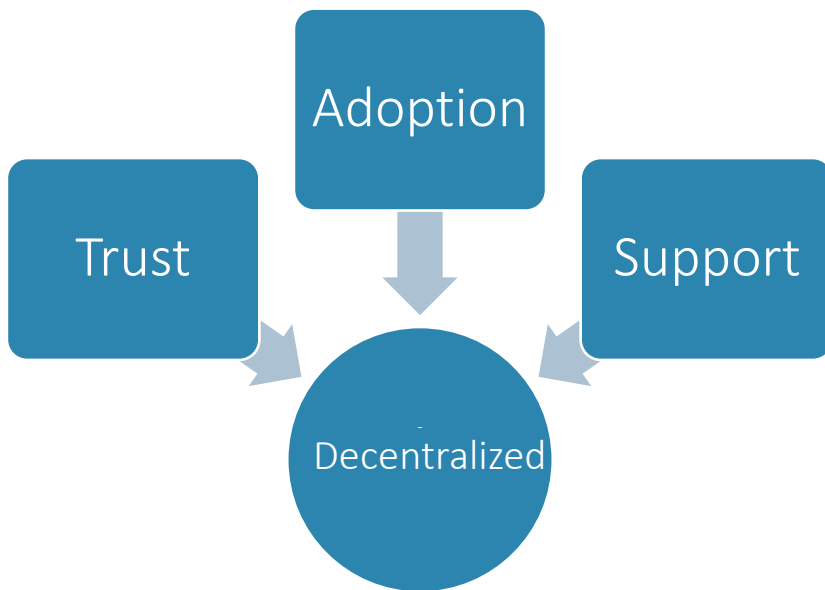

Payment: RANK TOKEN will be used as a payment asset for different websites. This will increase the token circulation and will provide value to the token. The Token only can be exchanged for valuable cryptocurrency. So each token will have value.

Reward: The reward system is designed for a small budget cryptocurrency project. This will benefit the Rank holders. Every project can sponsor RANK TOKEN. And the holder will be rewarded with valuable RANK TOKEN. This will increase the amount of service for every project. For example, Token Sale will increase if we distribute RANK TOKEN to the holders. There will be huge benefits for the holders. Monthly reward system or onetime reward system.

Risk-Free Environment: To reduce the market risk and increasing the trust of the users each buyer of any project (associate with rank token) will be rewarded with rank token.
